Certaine obseruations concernynge

The rules of phisike.

Vhen the weather is extreme hote, or ex-
 cedyng cold: it is not then good to
 purge or to let blode, vnllesse that
 some great necessity do requyre it:

Item no part of mans body, ought to be tou-
 ched wyth any chirurgicall instrumente, or

cut

It is said only

cauterie actual or potential, when the sonn
or mone, or the lord of the horoscop, is in the
same sygne, that ruleth þ part of mans body.
Al'o Gemini, led the last half of Lybra, and þ
first xii degree of Scorpio, wyth Taurus, Vir
go & Capricorne are not good for lettyng of
blod. And almost two dayes before the chaung
of the mone, & two dayes after is naughto
to let bloude.

It is to be noted farther
that the dayes in the kalender, be not marked
wyth thys letter (J) for then, that thyng that
you shal enterpryse, can not have so good suc
cesse. Moreover, clysters, and gentyl purga
tyons, maye be ministred at any tyme wyth
out danger. And as concernyng lettyng of
bloud, I say þ if it be for þ pestylence, phrens
sy, the pleuresy, squinācy, for a cōtinual hed
ache procedyng of choler or bloud, for any hot
burnyng ague or extreme payne A man may
not tary for a chosen daye, by the Almanacke
because þ pacyēt mought die in þ mean space,
but incōtynētly wyth al speede, he must be let
bloude, vnless he be very weake, or lyke to
soud Except al'o þ mone be in þ same signe,
that ruleth that part of mans body. Not with
standing al these rules aforesayd, yet I would
not wysh, þ any man should trust to much to þ
vnlearned surgia for lettyn of bloud, vnles þ
he haue first the counsel of some good phisici
on. For there be many things in such cases, to
be weyed & conydered, that passeth the grose
knowledge of the comon surgeons

28. A general rule to know when
the terme beginneth
and endeth.

Eight dayes before any Terme be,
the Wschequer openeth for certayn-
ty, except Trinitie terme, which is but
iiii. dayes before.

The Hilary terme beginneth the xxiij day
of January, if it be not Sunday: then
the nexte daye after, and endeth the
xii. daye of February.

The Easter Terme beginneth. xbiij. dayes
after Easter, and endeth foure dayes
after the Ascension daye.

The Trinity Terme beginneth the next
daye after Corpus Christi daye, and en-
deth the wednesdaye fortnight after.

The Michelmass terme beginneth the

The preface.

When I consider & my
selfe, the Inscrutable po
wre of God, ordering
all things at all tymes
at hys pleasure, accor
dyng to hys eternal de
cre and pꝛouidence: The censure and
Iudgement of al graue and wisemen,
and speciallꝑe of all those that bee of
high reputacion and authoritꝑe: The
multitude of learned men, not only in
the mathematical, but also in al other
sciences, that be thys daye floꝛꝑshing,
in this noble realme of Englande: I
beꝑng as one al amaid, and full of
feare, am greatly in doubt, whether it
may be expedient for me oz not, to write
thys yere and from hensforthe, any
moꝛe concernꝑng the Astrological pꝛe
dictions.

For I perceaue, yea and I heare with
myne eares, that so many repoꝛteth, &
Iudgeth, by so many & diuers ways,
of

of vs Astronomers: some reportynge
wel, and that but a few, other indiffer-
rently, but the most parte of all, do so
taunt, despise and laugh to scorne our
doings that in a Manner it wer better
for vs, (except it wer to satisfy a few
frendes) not to wyte any thing at all.
Wel, how soeuer the matter goeth, I
believe that ther is none of vsal Astro-
nomers, that wittingly doth, or wold
wyte any thyng, that should be pre-
judicial to the comon wealth, but ra-
ther to the comodity of it: in forewar-
nyng many tymes, of certayne daun-
gers, that may happen,

But some man perchance wyl say vn-
to me: Syr, god only and alone kno-
weth the thynges to come, I graunte
simpliciter and absolute, yet manye
tymes hee worketh by hys Instru-
ments: as by hys Angels, prophets,
and dyuerse holye men: and by the se-
conde causes (as by the starres and
planets) and the thyrde causes as by y-
elementis &c, whereby knowynge
and considering the causes aforesaid,

as (Verbi gratia) the Eclipses, chang,
full and quarters of the moone, and
the oth. r aspectes of the planets : we
may accordyng to our capacite and
measure of learnyng (as by a meane)
Iudge and oveshewe also the effect
to come, leavyng alwayes the desteny
and ful event, vnto gods almyghty
power, by whose prouydence, inanye
tymes the matter falleth oute farre o
therwyse, then we can comprehend o
wyte. The cause is chiefly, Gods
euerlastyng decre and pleasure our in
perfecte end not sufficient knowledg,
some tymes our negligence and ouer
sygh: and dyuerse tymes our to hasty
and rash setting fourth of our doyngs,
befeze they bee wel examined and try
ed. Ponderyng wyth my selfe al these
thyngs as aforesayd, and knowyng wel
myne owne Imbecillite : I can not
choose (as I sayde afoze) but be great
ly dysmayed, and straken wyth feare,
as often as I go aboute to wyte, and
speake of such hygh matters. as both
requyret a pprofonde knowledg, and
care

earnest study, as also because they ar,
set fourthe, to the open face of all the
worlde,

God I beseeche hym graunte mee, that
as in my wytyngs I meane wel, so
by them I maye offende no man in
word or dede, wyshinge euerye man to
take them in good parte as longe

as they passe not the bounds

of learnynge, and be not

also. in anye thyng re

pugnant to the

manifest truth

of gods holy word: whych

in any wyse and at al

tymes. god graunte

vs al to embrace

and folow.

Amen.

Thys yere. 1568. shall be de-
uided into two Reuolutions.

The fyrst shall begyn y^e r. day of
March, about midnichte, & shall
end the xiii. of September.

The second shall begyn, the xiii.
day of September & wil be ended,
y^e xi. of March, at the beginninge
of the yere of our Lord, 1569.

*¶ Of the firste part or Reuolucion
of thys yere.*

Ifynde in the begin-
ning of this yere, *Jupis*
ter to be lord of the As-
cendent, and also part
ly of y^e reuolutio. But yet blou-
dye and cruell *Mars* to leare the
sway, and be the chiefe gouernoz
of it, although it be to his paine
afterward

afterward. The Opposition
of *Saturne* to *Mercurye* pretendith
som secret and haynous malice
and hatred, yea and to worke
myschef (bearinge a couloure of
frendshippe in the face, but poi-
son in the hart) agaynste men of
learning, and others that be of
Mercurius syde, *Mars* helping the
same wth his trine aspect to *Mer-
cury*. For the *Martialistes*, that is
to say, all cruel people, as *Tur-
kes*, *Barbarians*. with al the ra-
ble of the *Machometists*, al An-
tichristians & bloudy ministers
are euer mortall enemies to the
muses, and their faythful soldi-
ers, *Imo Verius* I maye playnely
say it: They are alwayes enne-
mies

enemies to the truth. *Attamen,*
Veritas vincit. omnia (as *Esdras*
sayth) *eademq; manet in eternum.* Ju
piter the lord of the ascendent, be
inge yll placed in the .xii. house
(which is named of the Astrono
mers, the house of pryson and of
secret enemyes) who beyng as
it wer ready to thynke, and go
backward (y is to be retrograd)
foze the with trouble & damage
to dyuerse, and specially to me
of religion. But the mone in the
ix. house, y house of religiō, be
ing in *Leo* a cōstant & fixed signe
ayded and cōforted but a litle a
foze wyth the trine aspect of the
son & the oppositiō of *Venus*, wil
bee a greate helpe to y *Jouistes*.
Saturnus occidental & retrograd,
lozde

lorde of the second house, theso-
y the smal gaignes amonge ma-
ny occupiers and craftsmen.
And that much wares shall lye
vppon manye mens hands, and
not be vttered and solde, by rea-
son of a great & almost general
Eclipse that shall raigne in ma-
ny mens purses. Yet they that
be in the fauor of women, shall
haue no small profit and benefit
by the. For by womē this yere,
many shall fare y better. Except
parhappes that som married mē
may fare the worse, if their head
chaunce to meete w the ladell or
disestaffe. The same Saturne
also in *Nona domo tangens lineam
decime*, doth signifie in the peo-
ple smal fayth and truste, and to
bee

be almost without charity, mercy and pity. And that many shall toun their coates and tppets: departing frō y pure & trew religion, vnto the false and superstitious. And certayne shall vse cruelnes towards the deade, like madde dogges. Other shall enterpryse great Journeys to their great trouble and payne, & shall be longe er they retozne againe. Item, ther wyl be certayne ship petwzacks by the occasiō of soudayne & great blasts of wynd. dyuerse also shall be in trouble for lack of payinge their duties & tributes. Sol in quarta, sheweth y certayne men shalbe greatlye honozed & exalted and deserue, great prayse. And that som thinges

ges that were long afoze hyde, &
not knowē (as treasures & suche
like) shall come to lyght and be
known

Farther it is signified. *Ex capite*
in *Libra* that diuerse great & rich
men, shal vsurpe their powere
& oppresse those that be of the ba
ser sort and specially their tenā
tes: And shal lay things to their
charg, y they neuer thought of.
And by thys meanes, shal so pu
nish & endamage them, that the
pooze men shal bee broughte to
great miserie and pouertie.

And to conclude, considering
that y two great & dreadful pla
nets *Saturne* & *Mars*, in thys Re
uolucion, are situate in medie
tate, *Septentrionali*, beinge
bothe

bothe aboue oure hemisphere I
perceyue that great calamities,
& horrible things ar like to come
to passe this yere, and that to di-
uerse cuntryes. All which cala-
mities the greate Eclipses of the
Sonne of the last yere, wil fur-
ther & Increase, vnles that God
almighty do shyne vpo vs wyth
hys merciful countenaunce.

☞ *Of the second parte or Reuolu-
cion of this yere.*

In thys seconde renolucion,
the lord of the Ascendent, is
Saturne: & *Iupiter* beyng in y^r.
house must nedes be the chiefe
gouernoure of the reuolucion:
how soeuer *Saturne* & *Mars* stry-
ueth betwene themselves, who
of theim both shoulde haue the
domiⁿ

dominion, for in dede, they are
wonderfull stout and stronglye
armed on both sides, in so much
that the poore commons shall
haue troble enough this yere.
Yet *Iupiter* beyng treasurour of
the second house, y^e house of sub-
stance: wyl geue vnto them for
theire trayuel and paynes ta-
kyng, sufficient gaignes.

Whereas so many Planets ar
assembled together in the viii.
house: ther must nedes be sonie
what adoe for Inheritance and
succession but yet al for the best
as I can perceave.

Dominus Huius Revolutionis in Sag-
gittario forshewithe wonderful

I touched some parte the laste

yere. At the wythe also the pre-
minense & exaltaciō of certeine
noble and wise men to a higher
state and degre Yet the sone in
the eight house, *Loco magni In-*
fortuny, the withe the fall and des-
pression, & also the death of some
other great and rich men.

Mars in the ix. place, wyll pro-
voke the people to bee desirous
of war, and to be geuen to much
dissolute lvinge, to swearinge
& lvinge, and such like other vi-
ces, And *Mercury* also wil moue
striffe and contencion, betwene
men, for certaine olde grudges.

¶ Of the diseases.

of this yere

In the Reuoluciō for y^e fyrste
halfe of the yere, ther must ne
des

des be dyuerse kinds of diseases
raigning, by reason of the great
eclipse of the sone that was the
last yere. And also bycause that
Mercurie lozde of the vi. house,
is in *Domo cadente, termino et facie*
martis, and is also combust.

The diseases that be hot agues,
as wel simple as compound, *Syn*
ochi putrede, quotidian continen
ues, *semitertians*, continue
tertians, quartaynes, wyld,
straung, and Inconstante disea
ses, *Pleuresies*, *Squinancies*
Ulcerations & botches. In some
places the pestilence, and chief
ly toward the East parts, Abun
dance of corrupt humours and
corrupt bloud, goutes, collicks,
phrensies, *Migraynes*, *Lepro*
sies

ries Lunaticke diseases &c.
A mourene is lyke tofall by
pon cattell other kyndes of
beastes also shall not altoget
ther scape dāger, namly horses.
The most part of seruāts shall be
as they wer wonte to be of late
yeres: That is they shall be sicke
of the lourdaine disease. They
wylbe negligent, careles, Som
nolenti (that is, geuen to much
slepe) goyng about their worke
and busines like snayles cre
pyng, for feare of stumblinge.
And to be short slack enough in
all thyngs, sawyng in their
tongues, The good seruantes
I toche not Notwithstandyng
the multitude of the diseases a
foresayde, yet they shall not be

so dangerous, but that the most
parte may be cured, if men wil
consult wyth the cunnyng phy-
sitions in time, and not to late,
The diseases of the seconde Re-
uolucion, shall procede of much
cold and corrupte humours as,
Rewmes or Catharres, Gouts,
Collicks, Palsies, swellinge in
the Legges and fete, Dropsies,
Pthysies, blacke Jaundys,
payne in the sydes and raynes
of the backe, grauel and stone
in the raynes and bladder, Strā-
gurie, and such lyke

Of plenty and dearthe.

I fynde that by reason of *Iupiter*
in *sagittario*, ther shal be in the
spring time, certain sowtherne

wyndes.

wyndes, brynging fourth pastur
enough for cattel. But the vine-
yardes and trees shalbe hyndred
& suffre, by much snow & colde.
Corne, also, and speciallye
wheate, shal be nothing so plen-
ty as it was, and that partly for
lacke of sufficiente rayne, and
ouermuch heate and droughte.
And as Albumasar saith, This
shall bee a daungerous yere, &
is lyke to be litle store of butter
and tallow.

Of peace and warre

I Perceyue y Mars being di-
recte throughout the whole
yere, being strongly placed
nigh the weste angle wil cause
much contention and stryfe in
many

manye places, among a greate
many. And specially moche tro-
ble rouing, spoylinge and mur-
dering vpon the seas. wherby
it shall be daungerous for Mar-
chants, and other to trauaile o-
uer the seas into other cōtreys.
Saturn in *Virgo*, retrograde, war-
neth vs to beware of our ene-
mies, God graunte that they
haue no power ouer vs. Amen.
The coniunction of *Saturne* and
Mars in *July* is like to brede no
small stryfe, betwixte certayne
realmes, And *Mars* in the secōd
reuolacion, doth signifie much
robbing in the highe wayes, be-
sydes warre, and effusion of In-
nocent bloud, without pitie or
mercy.

As

As touching this matter, what
other thinges maye happen, I
haue declared largelye enough,
in my last yeres prognosticatiō
To the whiche you maye haue
recourse, if you lyst.

¶ A Short Admonicion

I haue alwaies sayd, & nowe
do say againe that the star-
res and planets haue power
many tymes to hurt our bodres
(by their influence, causinge
distēprance or diseases) but yet
haue no power ouer our wil,
Induced and led by reason, and
chiesely by the wisdomē proces-
ding and geuen of God.

But the euil disposed men, fol-
lowing alwaye their sensuall
tye

ty: They I say ar led not only by
the vanities, & elements of this
world, but also ar subiect many
times, to the Influences of y^e su-
perior bodyes, which Influtces
are not hurtful (as cōpelling mē
to do this or that) of them selves,
but that the wicked, in recea-
uing them wickedlye : turneth
them into euil and mischief And
so in this respecte, the starres &
planets ar sayde of the Astrono-
mers to moue & incline men to
do such euil or such: but not *per se*
et ex sua natura, of their own na-
ture. (*quia omnis creatura dei bona*
est, al creatures : of god ar good:
saith s: Paule) but onely. *per acci-*
dence (as we speake in logicke (by
reason of the euil disposed sub-
